E-COMERCE SALE ANALYSIS

Analysis in using DAX and Data Visualization

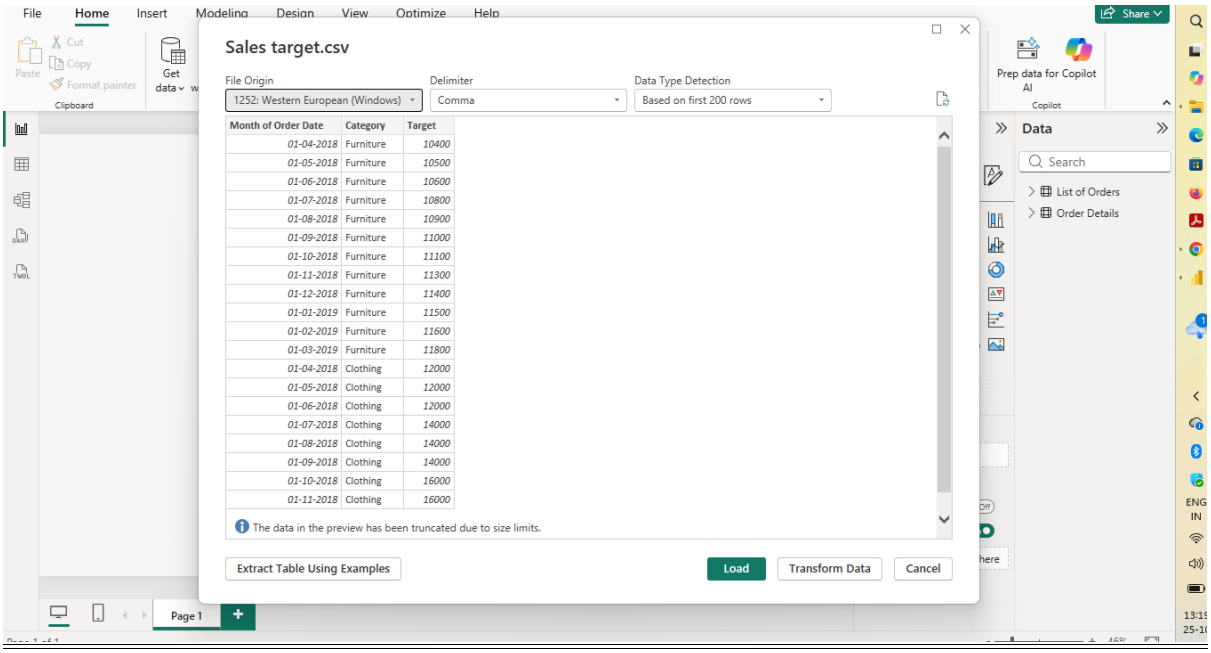

Assignment Description :

This project focuses on analysis sales performance using Microsoft Power BI. The report uses sales-related datasets, including Order Details, List of Orders, and Sales Target, to understand sales trends and business performance.

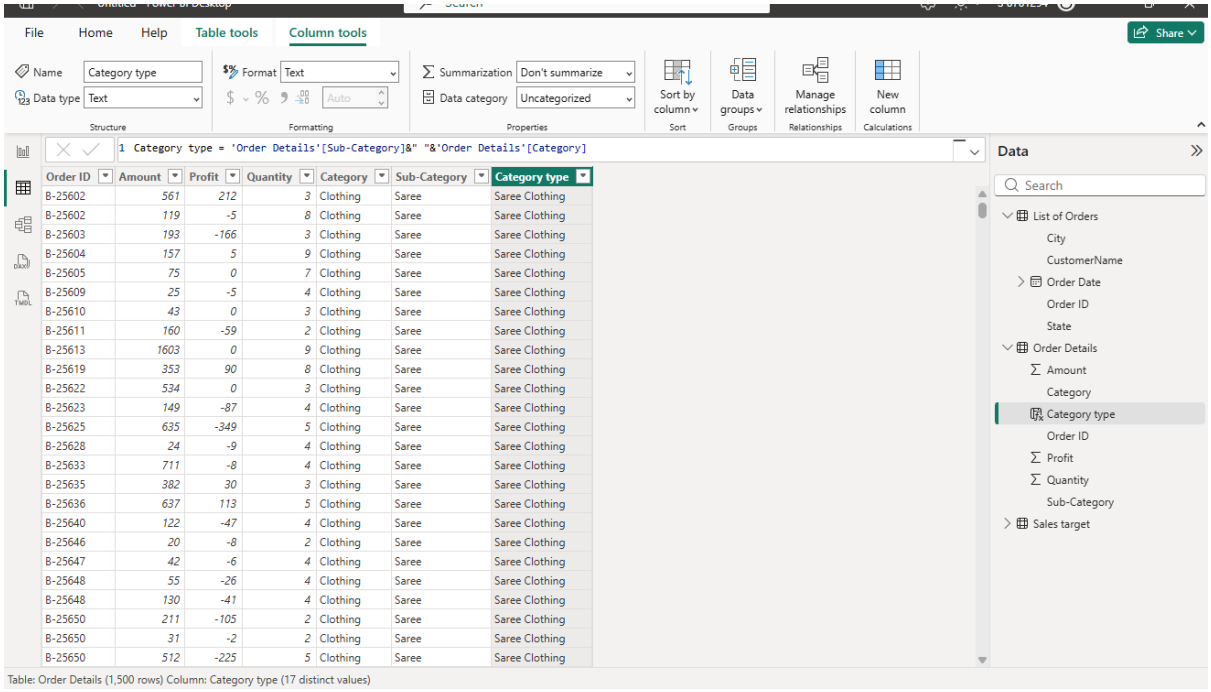

Column :

Column name	Description
Order id	Provides order id
Order date	Provides order date
Customer name	Provides customer name
City	Provides city for location
Category	Provides category
State	Provides state name
Amount	Provides amount
Profit	Analysis the profit
Location	Provides location
Profit margin	Profit margins
Profit status	Provides profit status
Month of order	Provides month of order
Target	Month target

1.Tranforming data:

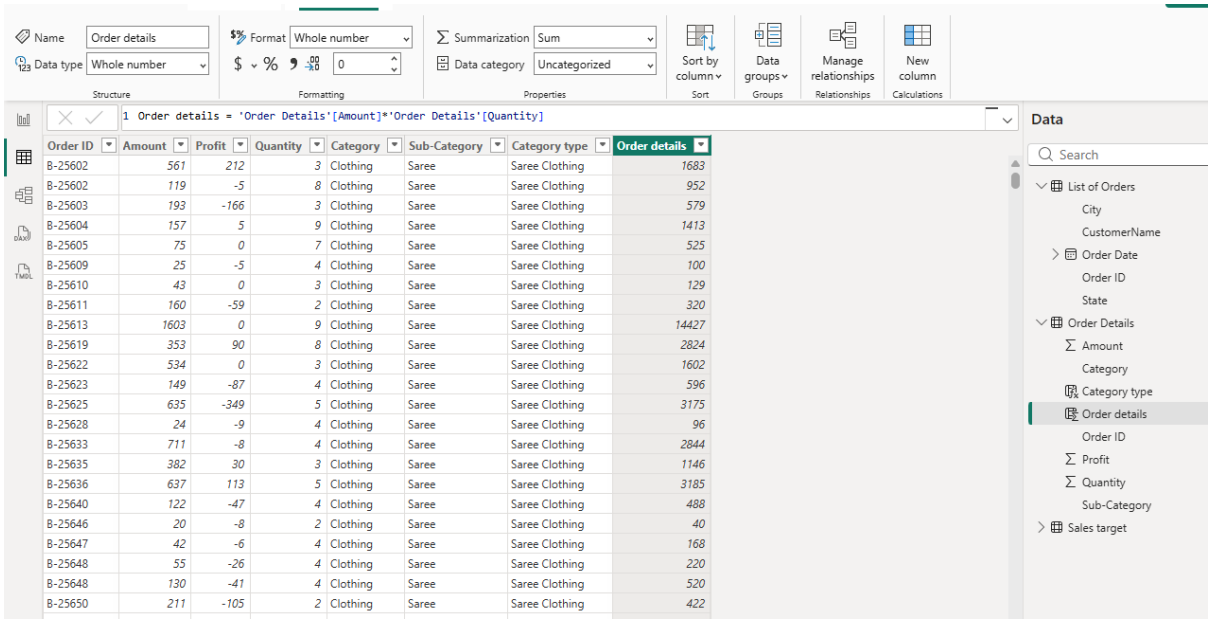

2 Create a Calculated Column for 'Category Type':

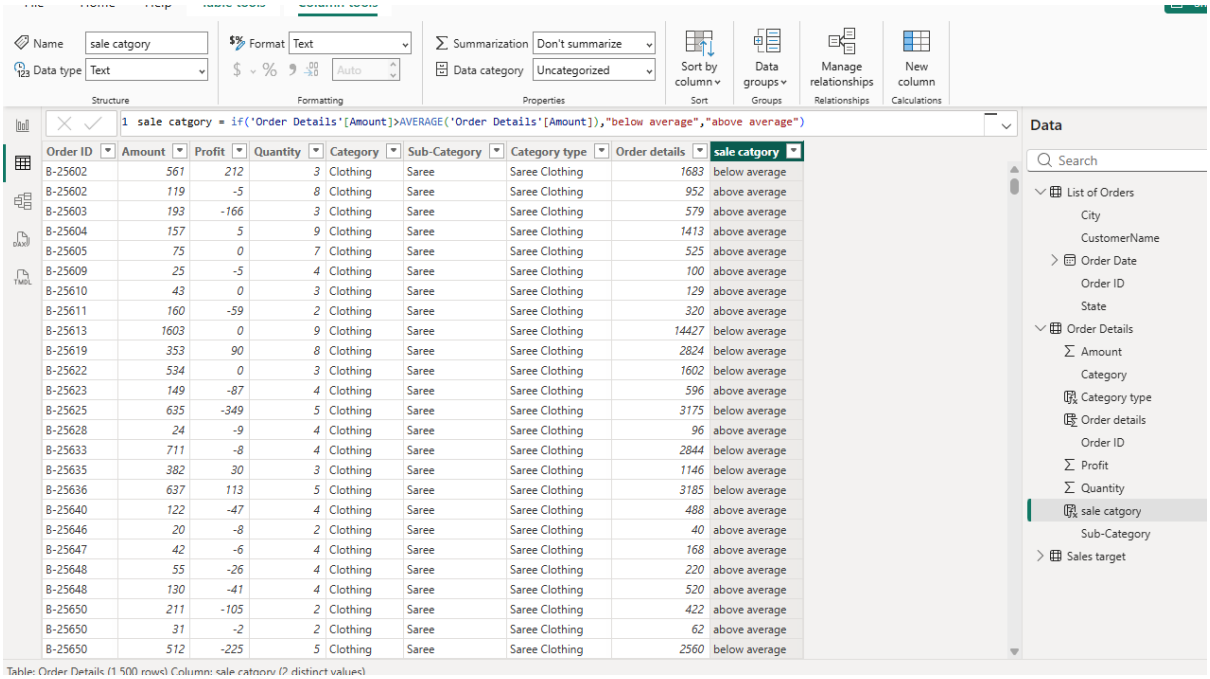

3 Calculate Revenue per *Order in Order Details Table:*

Order details = 'Order Details'[Amount]'Order Details'[Quantity]*

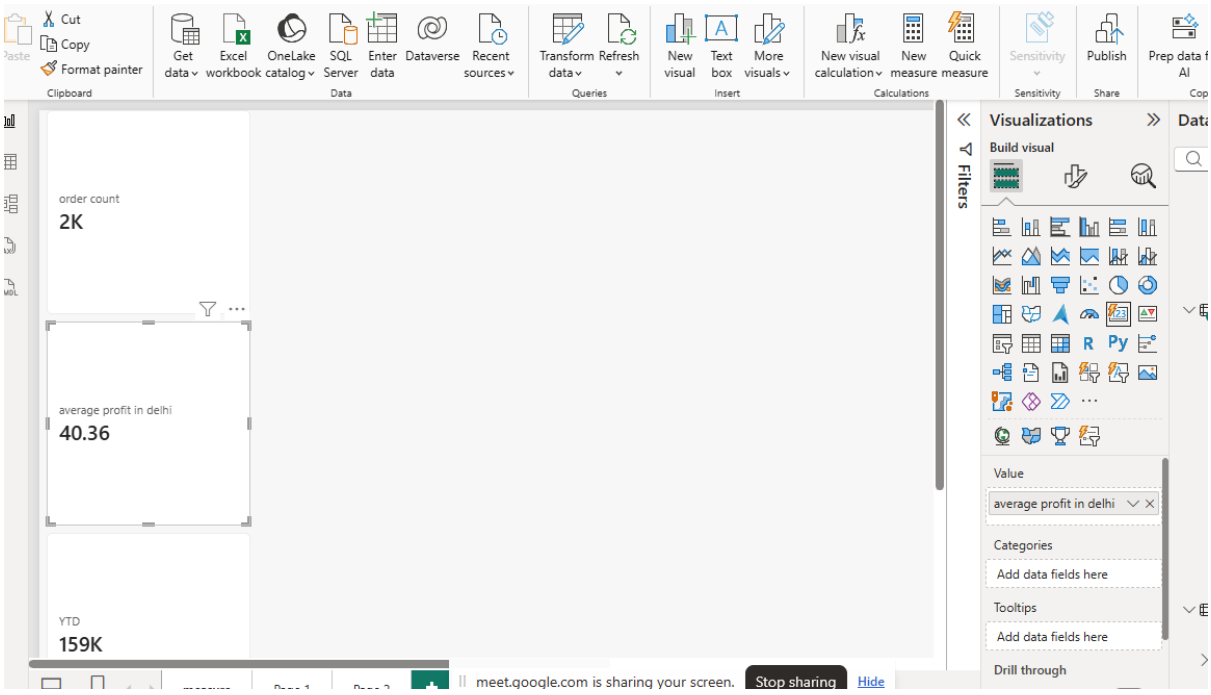

4 Create a Calculated Column to Categorize Sales:

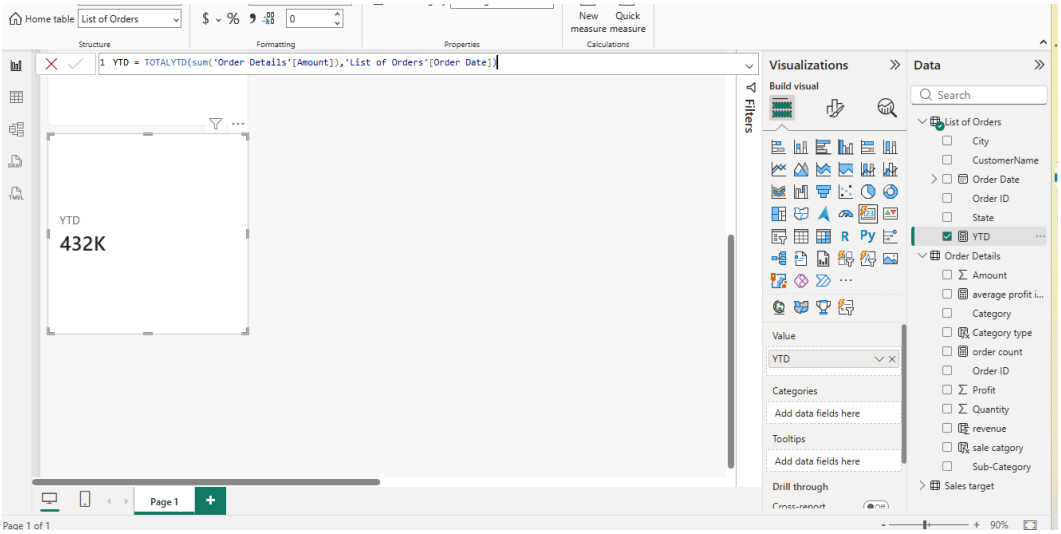

sale catgory = if('Order Details'[Amount]>AVERAGE('Order Details'[Amount]),"below average","above average")

Calculated Measures:

Order count and average profit in Delhi and YTD

YTD = TOTALYTD(sum('Order Details'[Amount]),'List of Orders'[Order Date])

average profit in delhi = CALCULATE(AVERAGE('Order Details'[Profit]), 'List of Orders'[State]="Delhi")

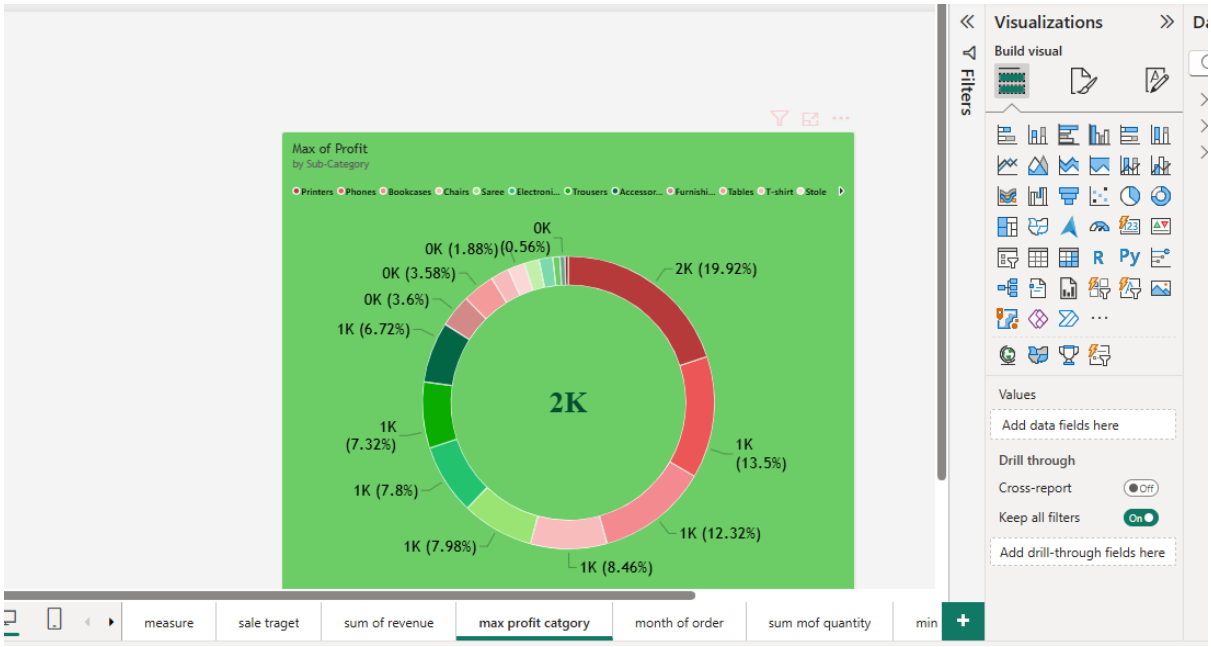

order count = COUNT('Order Details'[Order ID])

Data Visualization:

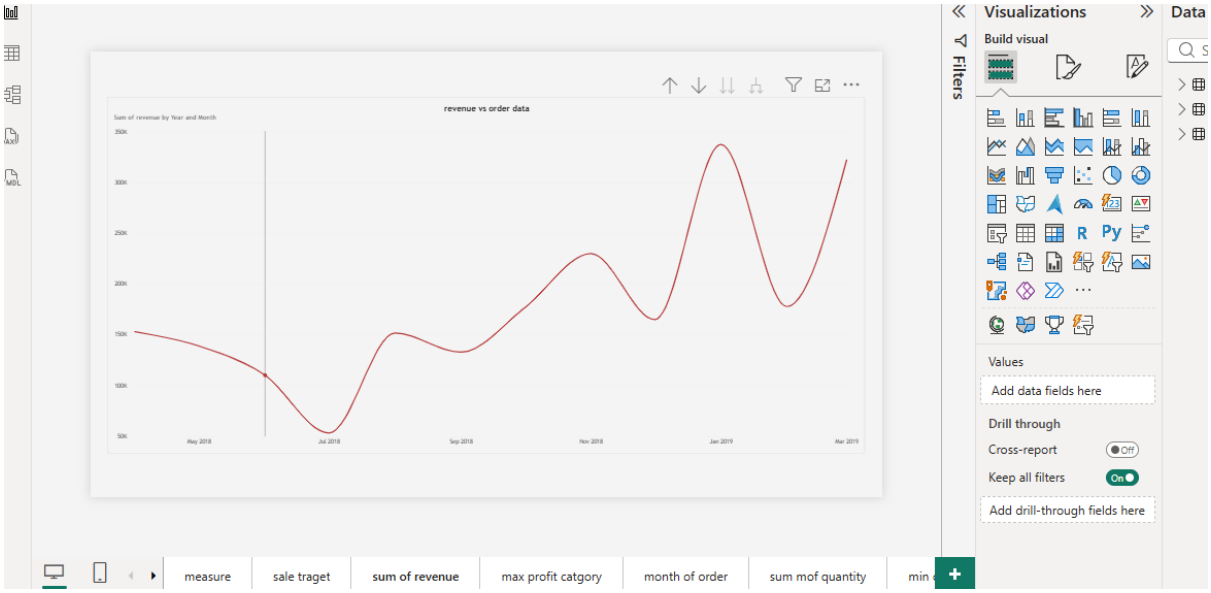

SALES TARGET ACHIEVEMENT BY CATEGORY:

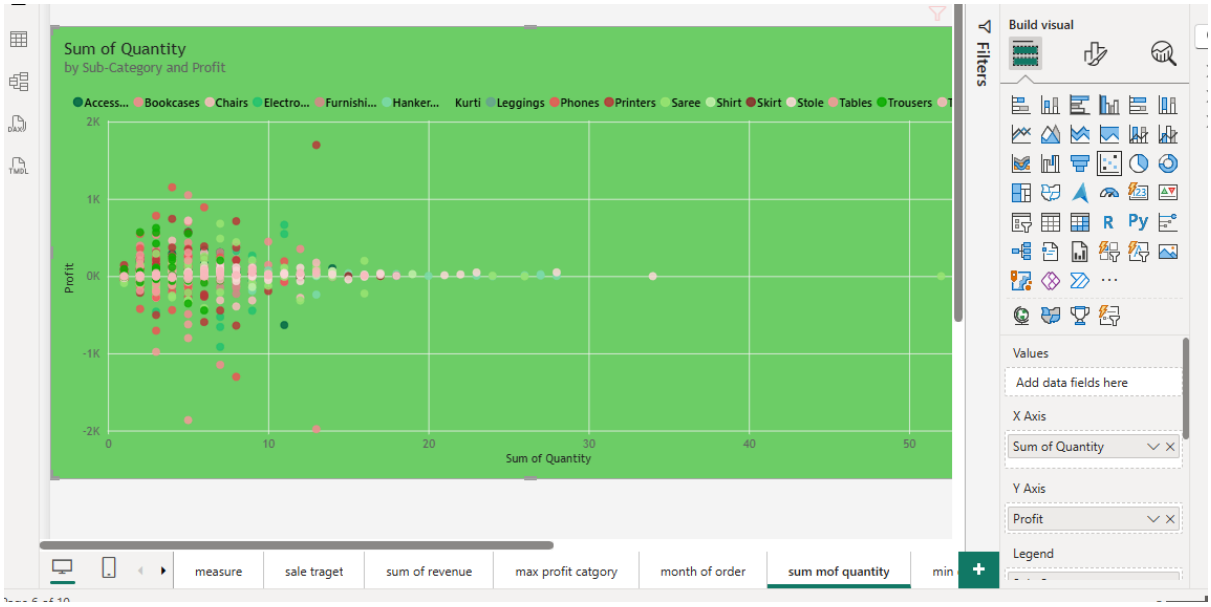

MAX PROFIT MARGIN BY SUB-CATEGORY:

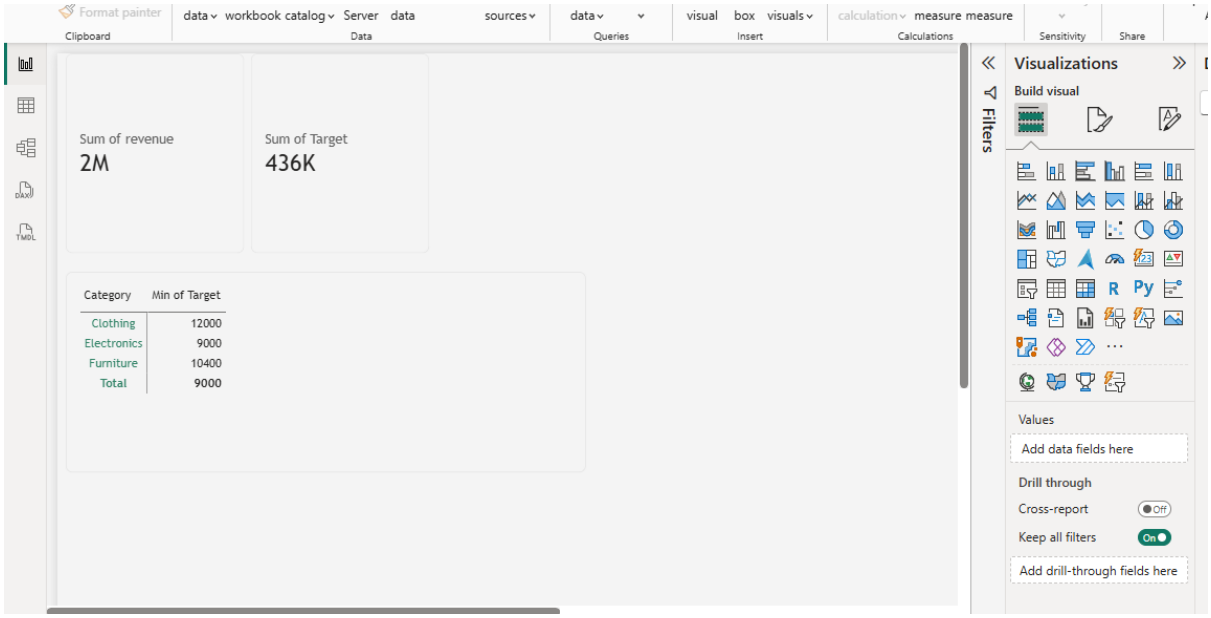

MONTHLY SALES TREND:

COMPARISON OF PROFIT AND QUANTITY BY SUB-CATEGORY:

COMPARISON OF TOTAL SALES AMOUNT AND TARGET:

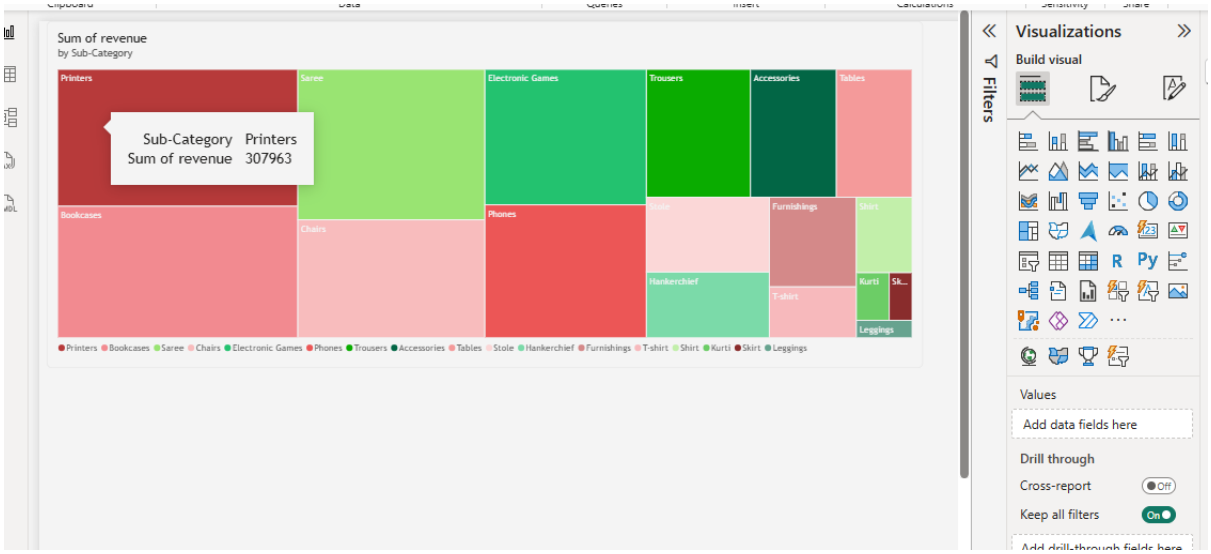

SALES PERFORMANCE MATRIX:

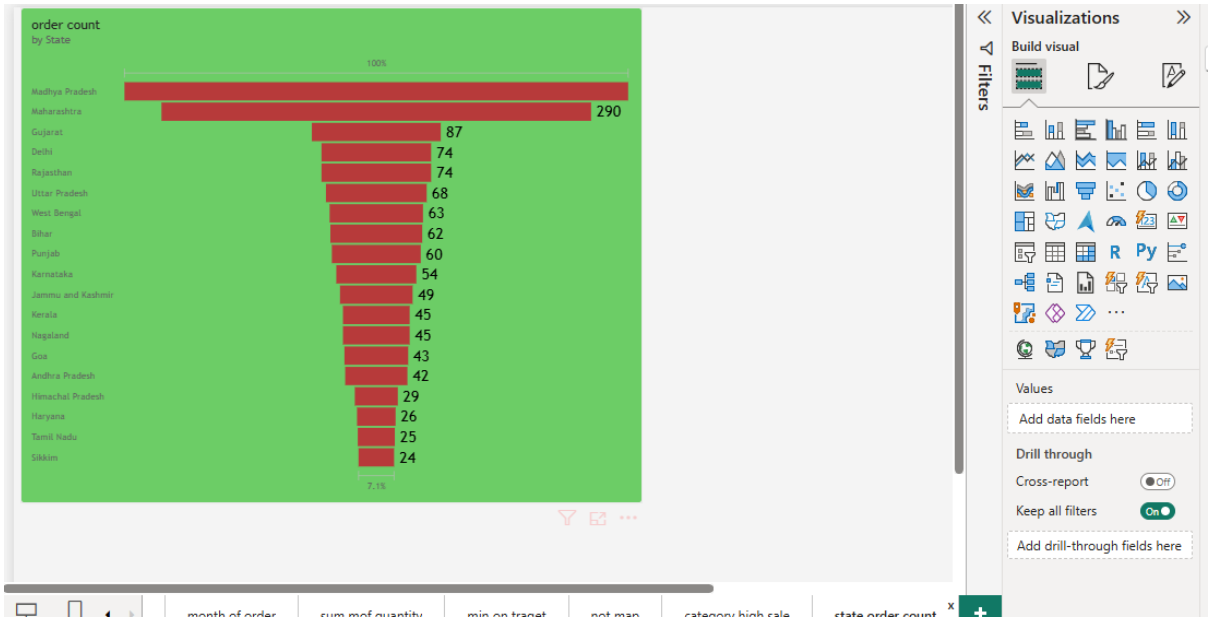

GEOGRAPHIC SALES ANALYSIS:

NOT WORKING MY POWER BI

SALES DISTRIBUTION BY SUB-CATEGORY:

ORDER COUNT ANALYSIS BY STATE:]

Thank you mam
